**Subject:** CAG Meeting 15 Nov 2017

Hello, Janis and Jackie.

I found out yesterday I will be deployed for EPA's CA fire response efforts starting this weekend, and will need to miss the CAG meeting on 15 Nov. However, I was at meetings with Aerojet and the State yesterday, and we are on the same page with regard to my projects.

Area 40 Ambient Air Sampling: Chris Fennessy agreed to provide a summary of the first quarter Area 40 ambient air sampling event to the CAG next week and discuss our agreed-upon plan forward.

LUC Inquiry at Sept CAG Meeting: Chris, Alex MacDonald, and Jim Rohrer can also briefly discuss LUCs with the CAG; all of us attended a meeting regarding this yesterday. I asked Chris to hand out copies of the recorded Former Company Store (OU5-perimeter groundwater) Land Use Control at the CAG meeting, which includes vapor mitigation requirements. The CAG can review the LUC over the next couple months and we can discuss questions on the LUC at the Jan CAG meeting. Although this particular LUC is already recorded, Aerojet would like to use it as a template for other vapor mitigation LUCs in the future.

On-site Aerojet VI Investigation: Regarding Aerojet's ongoing site-wide vapor intrusion investigation, Aerojet will submit a draft VI response to EPA's spring evaluation including additional sampling and building data on 27 Nov. EPA and Aerojet will meet to determine required winter indoor air sampling on 14 Dec.

Off-site (community) VI investigation: Per our meeting yesterday, Aerojet will proceed with community soil gas sampling at the end of this month if dry season conditions are still present in the subsurface. Yesterday we negotiated an approach forward with regard to the locations of dry season soil gas sampling. If wet season conditions are present, dry season soil gas sampling will be delayed until 2018.

Thank you, and have a nice Thanksgiving,  
Lynn

Subject: Re: Automatic reply: Upcoming CAG meeting

Hello Lynn,

I had just finalized the agenda and sent it to Tammy, but I believe it reflects the concepts you have below, although I did include DTSC regarding the land use issues. And yes, I'm glad that we plan to discuss the land use controls.

Thank you!

Janis
